

Vacancy – Field Service Engineer (junior)

The company

Mechanical Field Support BV (MFS) is “taking care of power”. Finding solutions in a continuous changing working environment serving today's and the future needs of our customers. With our head office and workshop located in Heteren, The Netherlands, and our regional offices in Mexico and China, MFS is supplying worldwide independent gas turbine services.

MFS portfolio includes technical advisory, installation & commissioning, inspections, overhauls, relocation projects, rehabilitation projects, controls system services, control system replacement, package works, parts supply, repairs and service agreements for mainly General Electric (GE) gas turbines.

Working for MFS means a job in an internationally oriented, dynamic and informal working environment with a good salary and good secondary conditions, in line with your experience and qualifications and the possibility to grow.

Please visit our website: www.mfsupport.com for more information about our company.

Job description

After an internal training program, you will start in our workshop in Heteren, The Netherlands and going on field service jobs occasionally. The goal is to become a fully skilled independent and worldwide working field service engineer.

During the beginning you will work together with the senior field service engineer for inspection, trouble shooting, repair, overhaul, installation and start-up of gas turbine packages. These works will be national as well as international.

Your specific tasks

- Working in our workshop in Heteren, The Netherlands, as preparation for field service jobs;
- Conduct mechanical works on gas turbine equipment in the workshop and at the customer on-site, onshore and offshore;
- Preparing inspections and repairs of gas turbine packages at customers location;
- Technical reporting of the activities;

Visiting Address:

Weerbroek 13
6666 ML Heteren
The Netherlands

Your profile

- You have a technical education diploma, MBO level 4, and preferable 3 years of working experience;
- Preferable completed your study in the direction of Mechatronics, AOT (Algemene Operationele Technieken), WTB (Werktuigbouwkunde) or engineering and process-industry;
- You like performing mechanical works on complex equipment;
- You are eager to learn all about gas turbines;
- You like to travel (up to 60-70%);
- Ability to work with mechanical, piping and Instrumentation drawings;
- Know how to express yourself verbally and in written;
- Good English, verbally and in written; other languages like for instance German will be a plus;

What do we offer

MFS gives you the opportunity to grow to a level of a skilled field service engineer or supervisor. The MFS team will invest in you and you will be given the opportunity to learn all about gas turbines and gas turbine packages.

We have short communication lines, are a service minded company and always available to support our high valued customers all over the world at any time.
