

mfs

taking care of power

Your power is our care!

MFS, taking care of power!

MFS, founded in the Netherlands in 2001 is specialized in gas turbine maintenance, services, parts, site management, consultancy and training.

Specialized

- Aeroderivative gas turbines GE
LM series: LM1600, LM2500, LM5000, LM6000
- Heavy Duty gas turbines GE
Frame series: Frame 1, Frame 3, Frame 5, Frame 6, Frame 9
- Other brands: FT4, FT8, PGT10, PGT25

We have 25+ years' experience as a worldwide, independently operating organization in the gas turbine market. Including oil & gas installations, power generation plants and commercial marine propulsion. To ensure immediate response to your needs, our experienced and skilled engineers, specialized in Aeroderivative and Heavy Duty gas turbines, are 24/7 available.

It is our mission to improve your profitability, reduce the downtime of your gas turbine and decrease your total cost of ownership. From our head office and workshop in the Netherlands and our subsidiaries in France, Pakistan and Mexico, MFS offers you one-stop-service.

Capabilities

- Field services
- Workshop services
- Parts & Tooling
- Engine lease pool
- Service Agreements (LTSA, MYA, FWA)
- EPC Contractor

Service Agreements (LTSA, MYA, FWA)

Within a Service Agreement, we make sure your gas turbine will be continuously serviced and maintained in order to optimize your cost of ownership. Taking care of your power!
